

Attention all members of the CACPR!

You are eligible to join the **Cardiac Health Foundation Of Canada's National WALK OF LIFE Campaign**. This fundraising event is in association with the **CACPR** and is open to cardiac rehab programs with at least one CACPR Member. All WALK events are community based and organized locally with assistance from the Cardiac Health Foundation Of Canada. This assistance is in the form of administrative support, walk guidelines & suggestions, customized brochures specific for each venue, printing and shipping of tri-fold double-sided brochures and publicity posters. Colour imprinted T-Shirts are also included and shipped to each site and there is the option of having custom printing with local sponsors on the backs of the shirts and also access to incentive prizes. All participating programs retain all locally raised funds, sponsorship and registration and in addition receive a monetary grant back from the Cardiac Health Foundation of Canada, presented at the CACPR Conference (this amount is based on the funds raised & number of WALK participants of each cardiac rehab centre).

Over 30 centres participate annually across the country with over 7,000 participants and raise more than \$ 1 million collectively across Canada for Cardiac Rehabilitation, Education and Prevention.

Use the funds that your cardiac rehab centre raises for patient materials, public awareness, professional and continuing education (CACPR conference; webinars), cardiac rehab and medical equipment and facilities.
